EXPERIENCE

Fullstack Developer

2020-2024

CSI

As a Fullstack Developer at CSI, I will be responsible for designing, developing, and maintaining both front-end and back-end applications. This includes collaborating with cross-functional teams to translate business requirements into technical specifications, ensuring high-quality code and performance, and contributing to the continuous improvement of our software development lifecycle. Key responsibilities include developing and implementing RESTful APIs, designing and implementing user interfaces, and deploying and maintaining applications in cloud environments.

PROJECTS

Ecommerce dashboard

Reactjs ,Mongodb ,Nodejs

The "Ecommerce Dashboard" project is a dynamic, real-time analytics platform built using ReactJS, NodeJS, and MongoDB. It provides a comprehensive overview of key ecommerce metrics, including sales, inventory, and customer behavior. The ReactJS frontend offers an intuitive user interface, while the NodeJS backend handles data processing and API calls to the MongoDB database. This project delivers crucial insights to optimize business performance and inform strategic decision-making.

Resume Builder

Nextjs ,OAuth

Resume Builder is a web application built with Next.js and integrated with OAuth for secure user authentication. It provides a user-friendly interface for creating and managing professional resumes. Users can leverage pre-designed templates, easily input their experience and skills, and download their resume in various formats. OAuth integration ensures secure user accounts and data management.
